

■ Professional Learning Day – October 10

Northrop Frye School

Our staff are spending the day learning and collaborating to better support our students' learning and well-being.

■ Understanding ADHD

Focus: Building knowledge about ADHD and how it affects learning.

Goal: Help teachers better support students' attention, focus, and executive functioning in the classroom.

■ Improving Numeracy Instruction

Focus: Using assessment data to guide math instruction.

Goal: Plan strategies and create differentiated materials to meet all students' math learning needs.

■ Professional Learning Choice Groups

Focus: Encouraging ongoing professional growth.

Goal: Staff collaborate in areas of personal interest throughout the year:

- Educational book or research study
- Indigenous ways of knowing & diversity learning
- Positive Behaviour Interventions and Supports (PBIS)

■ Assistive Technology & AI Tools

Focus: Exploring ways technology can support teaching and communication.

Goal: Learn how assistive tech and AI can make planning, assessment, and classroom support more effective — while keeping privacy top of mind.
